WORK EXPERIENCE

Front End Web Developer

2023
February/Ongoing

Self-Taught
Design and Visualization

While contemplating how I could utilize my architectural skills in game design, I had the opportunity to try coding, and I instantly fell in love with it. It has become a passion of mine and has now become the primary focus of my life. Since then, I have been dedicated to honing my skills in the field of software development. I have completed the FreeCodeCamp JavaScript and Algorithms course, and I am currently working on projects through the Odin Project curriculum. Additionally, I challenge myself by solving algorithmic problems on LeetCode.

CG Architect

2022 - 2023
August/January

Freelancer
Design and Visualization

With extensive practice and dedication, I have sharpened my proficiency in utilizing 3ds Max and Corona Renderer, enabling me to achieve excellence in freelance visualization projects across international boundaries. To provide a comprehensive display of my work, I have developed a portfolio website. Continually driven by a passion for growth, I remain committed to refining my abilities through continuous learning and embrace opportunities to expand my horizons by undertaking projects on a global scale. My dedication to self-improvement ensured that I was constantly evolving as a visual artist in the field of 3D visualization and rendering.

ARCHITECT

2021 - 2022
February/August

Egebey Construction
Housing Projects Design & Application Control
Factory Construction Applications

I was employed as an architect at a contracting company that has recently expanded its services to include design work. This expansion came about as a result of my demonstrated potential and expertise in the field. My current projects involve designing additional factory buildings and villa projects in Izmir and Manisa.

Within these projects, I am responsible for various tasks including site exploration, surveying, design and project drawing, cost estimation, customer communication, and project presentations. Additionally, I actively engage in on-site construction supervision to ensure smooth progress and adherence to specifications.

My role encompasses a wide range of professional responsibilities, allowing me to contribute effectively to both the design and implementation stages of construction projects.
